contemporary
lifestyles

SAPIENSTONE

Dark Marquina

Depth and elegance for spaces with character

Refined, intense Dark Marquina is a new SapienStone colour for dressing up kitchen countertops. With fine white veins on a black background, this colour reproduces the nuances of one of Spain's most popular marbles: Black Marquina.

The contrast between black and white makes it perfect for elegant spaces with a bold personality, while the technical features of SapienStone porcelain guarantee resistance, durability and hygiene in the kitchen.

The Dark Marquina countertop, only 12 mm thick, is available in two finishes: Satin, with velvety visual and tactile qualities, and Polished, an unmatched way of enhancing the depth of black.
